## Correction to: Graphing and reporting heterogeneous treatment effects through reference classes

James A. Watson<sup>1,2\*</sup> and Chris C. Holmes<sup>2,3\*</sup>

Correction to: Trials 21, 386 (2020) http://orcid.org/10.1186/s13063-020-04306-1

Following publication of the original article [1], we were notified that Eq. (1) is wrong and needs replacing. Eq. 1 should have been written:

ITE
$$(q_i) = C_1 \sum_k w_k y_k \mathbf{1}(t_k = T_1) - C_0 \sum_k w_k y_k \mathbf{1}(t_k = T_0)$$

This has divided the sum into its two component parts and replaced the symbol C in the previous version with  $C_1$  and  $C_0$ .

Instead of: 
$$C = (\sum_k w_k)^{-1}$$
, the definition of  $C_1$  and  $C_0$  is given by:  $C_j = (\sum_k w_k \mathbf{1}(t_k = T_j))^{-1}$  for j=0,1.

In addition, in Eq. (2) and at multiple instances after,  $\gamma/N$  needs to be replaced by  $\gamma N$  (there should not be a division symbol).
